Operational Surface Hygiene - Ongoing Protection Between Cleans

 SIQURA

SIQURA™ Commercial Grade Disinfectant will destroy 99.99% of bacteria on the treated surface within 5 minutes and provide ongoing protection for up to 30 days. It is the smarter clean, being convenient to use, sustainable, non-leaching, long lasting and above all, friendly to humans, pets and plants.

SIQURA™ Surface Sanitizer is a simple and cost effective sanitizer hard floors and concrete. Kills 99.99% of bacteria, mould and fungus within 5 minutes and provides lasting protection for up to 90 Days. Simple application by spray, mop or cleaning machine for lasting protection on hard floors, carpets, fabrics, porous surfaces, joins, corners and other hard to clean areas.

- Doesn't change the surface appearance or profile.
- Non-staining, pH neutral & non-corrosive.
- Does not contain surfactants that can attract and hold soil.
- Destroys odour causing bacteria mould and fungus.
- Surface bound molecular matrix will not build up with repeated applications.

 gripguard

Gripguard Enzyme Floor Maintainer contains pure enzymes that are 100% effective at emulsifying and biodegrading proteins such as grease, food waste, animal fats, mold, bacteria, viruses and other organic matter. It is a 'mop and go' application that requires no scrubbing, brushing, or rinsing.
