

There are myriad different surface applications in any health facility and maintaining hygienic surfaces is a lot more complex than just cleaning.

We provide long term, cost effective and sustainable solutions for;

New Build and Refurbishment Projects – High Performance, cost effective and easy to maintain.

Repairs and Maintenance – Minimising disruption and extending life of existing finishes.

Hygienic Treatments – Improving hygiene with bonded antimicrobial treatments for most surfaces, equipment and furniture.

Problem solving – Technical expertise to assist with solutions to surface performance problems.

We can help with;

- **Impact Resistance** – Minimise damage and painting costs

BIO | ARMIS

Antimicrobial textured rigid PVC wall, door and corner protection (IPU's, treatment, waiting, corridors, BOH, utility, etc).

- **Hygienic Wall Solutions** – Improved cleaning and hygiene in critical areas

BIO | CLAD

Antimicrobial smooth rigid PVC wall cladding for sterile and clean areas (Theatres, CSSD, Laboratories, Clean Rooms).

 **microcote**
antimicrobial

Polyurethane protective coating for intensive clearing, chemical resistance, moisture resistance, long lasting antimicrobial protection on almost any surface.

- **Floor Protection, Restoration and Safety** – Extend life and improve safety and compliance.

Restore and protect with the Microcote range. Concrete, vinyl, linoleum, tile and grout, terrazzo and more. Extend life and restore anti-slip on most floor finishes.

 **microcote** HPU **microcote**
anti-slip **microcote**
antimicrobial**BIO | FLOOR**

Antimicrobial R10, R11 & R12 Premium Safety flooring. 15 Year Product and Slip resistance warranty. Designed for performance.

- **Antimicrobial Bonded Surface Treatments** – Long lasting antimicrobial protection.

 **SIQUA**

Siqua Hospital Grade Disinfectant – TGA approved, kills 99.999% of bacteria with 24 hour protection between cleans.

Siqua Surface Sanitiser. Up to 90 day continuous antimicrobial protection for carpets, hard floors, concrete and porous surfaces. Kills bacteria, mould and fungus. Inhibits odour.
