

HOSPITAL GRADE SURFACE DISINFECTANT & PROTECTANT

DISINFECTS & PROTECTS FOR UP TO 24 HOURS

SIQURA™ Hospital Grade Surface Disinfectant is a simple and effective way to kill microbes and protect surfaces continually for up to 24 hours.

SIQURA will destroy microbes on the treated surface. Allowing the product to dry will also coat the surface with a microscopic protective layer for continuous microbial protection.

It is ideal for use around children and pets.

**up to 24 hours
continuous
protection**

**kills up to 99.999%
of pathogenic
microbes**

**bonds to
most surfaces**

24 HOUR HOSPITAL GRADE DISINFECTANT & PROTECTANT

AUSTRALIAN TGA CERTIFIED

SIQURA is certified by the Australian TGA (Therapeutic Goods Administration) as a hospital grade surface disinfectant that kills >99.999% of microbes, and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation), continually for up to 24 hours. The Siqura active is US EPA listed. SIQURA Hospital Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

BONDS TO APPLIED SURFACES

SIQURA Hospital Grade Surface Disinfectant is applied wet, onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, SIQURA does not leach from (or leave) the treated surface, and it does not deplete in microbial efficacy or promote microbial resistance.

CONTINUOUS NON-STOP PROTECTION

SIQURA Hospital Grade Surface Disinfectant has been tested against a wide range of pathogens including Escherichia Coli [ATCC 8739], Pseudomonas aeruginosa [ATCC 15442], Staphylococcus aureus [ATCC 6538], Enterococcus Hirae [ATCC 10541], Salmonella choleraesuis [ATCC 10708] and odours causing bacteria. SIQURA Hospital Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

HUMAN FRIENDLY/ECO FRIENDLY

SIQURA is the smarter clean, being simple to apply, sustainable, non-leaching, long lasting and above all, friendly to humans, pets and our environment. SIQURA contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds, and in final life, SIQURA breaks down to form harmless organic compounds. It is non-staining, pH neutral and non-corrosive, making it suitable for a wide variety of healthcare and commercial applications.

Key ingredients of Ammonium Chloride are recommended by the Australian Department of Health for effectiveness against COVID-19

APPLICATIONS

medical rooms

aged & disability care

hospital beds

medical equipment

office equipment

nurses' station

food preparation

patient transport

bathrooms & wash basins

walls & floors

fixtures & touchpoints

furniture
