

SIQURA PROFESSIONAL FLOORING DISINFECTANT AND PROTECTANT

DISINFECTS AND PROTECTS FOR UP TO 90 DAYS

SIQURA™ Professional Flooring Disinfectant and Protectant is a simple and effective way to kill microorganisms and reduce odour in floors. It eliminates odour-causing bacteria and inhibits mould and mildew. SIQURA bonds to the surface creating a microscopic protective layer that kills bacteria, viruses and fungi and provides continuous ongoing protection. SIQURA is alcohol-free and partially derived from coconut oil, allowing it to be made without harmful chemicals, so that at the end of its life it breaks down into natural, organic compounds. It is ideal for use around children and pets.

continuous
protection on
carpet and fabrics

up to 30 day
continuous
protection on
floors and surfaces

kills up to 99.99%
of pathogenic
microbes

inhibits mould
and odour

THE SIQURA DIFFERENCE

KILLS UP TO 99.99% OF PATHOGENIC MICROBES

SIQURA is a broad-spectrum antimicrobial tested against a wide range of pathogens and effective against bacteria, viruses, mould and fungi including Legionella, E.Coli, Pseudomonas, Staphylococcus aureus, Enterococcus Hirare, Salmonella and Aspergillus Niger. Flash kills up to 99.99% of pathogens within 5 minutes of contact.

NON-STOP PROTECTION

SIQURA's unique technology bonds to surfaces as it dries creating an invisible matrix of electrostatically charged spikes that provides continuous antimicrobial protection. Because it is bonded to the surface it does not deplete in efficacy and remains ready to defend treated surfaces against contamination and biofilm formation.

HUMAN, PET AND ENVIRONMENTALLY FRIENDLY

SIQURA is derived from coconut oil and replicates the forces used in nature to protect against pathogens, breaking down into harmless organic compounds at end of life.

SIQURA contains no poisons or harmful chemicals such as chlorines, bleaches, carcinogenic or endocrine disruptive compounds and does not leach or accumulate in environment.

AUSTRALIAN OWNED AND MADE

SIQURA is an Australian owned and made product and is locally distributed by a family owned, Ballarat based small business.

Key ingredients of Ammonium Chloride are recommended by the Australian Department of Health for effectiveness against COVID-19
