

COMMERCIAL GRADE SURFACE SANITISER & PROTECTANT FOGGER

DISINFECTS & PROTECTS FOR UP TO 30 DAYS

A simple and effective way to kill microbes and protect surfaces for up to 30 days. It eliminates odour-causing bacteria and inhibits mould and mildew.

Protect family, staff, customers and your business with a simple low cost, low labour surface disinfectant solution for small indoor spaces and vehicles.

Disinfects stock, equipment and hard to reach places.
Safe for fabrics, leather, carpets and all hard surfaces.

**up to 30 days
continuous
protection**

**kills up to 99.99%
of pathogenic
microbes**

**inhibits mould
& odour**

30 DAY COMMERCIAL GRADE SANITISER & PROTECTANT FOGGER

KILLS 99.99% OF PATHOGENS

SIQURA is a broad spectrum commercial grade surface disinfectant that kills >99.99% of microbes and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation), continually for up to 30 days.

BONDS TO SURFACES

SIQURA Commercial Grade Surface Disinfectant is applied wet, onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, SIQURA does not leach from (or leave) the treated surface, and it does not deplete in microbial efficacy, create a field of inhibition or promote microbial resistance.

NON-STOP PROTECTION

Through a biomechanical process, the electrostatic charge interacts with the microbe lipid layer, resulting in permanent destruction of the bacterial cell. Because the organo silane isn't consumed in the disinfection process, it remains ready to continually defend treated surfaces against contamination and bio film formation.

BROAD SPECTRUM

SIQURA Commercial Grade Surface Disinfectant has been tested against a wide range of pathogens including Legionella, E. Coli, Pseudomonas, Staphylococcus aureus, Enterococcus Hirare, Salmonella and Aspergillus Niger. SIQURA Commercial Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

HUMAN FRIENDLY/ECO FRIENDLY

SIQURA is the smarter clean, being convenient to use, sustainable, non-leaching, long-lasting and above all, friendly to humans and pets. SIQURA contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds and, in final life, SIQURA breaks down to form harmless organic compounds.

Key ingredients of Ammonium Chloride are recommended by the Australian Department of Health for effectiveness against COVID-19

APPLICATIONS

hospitality

childcare

aged & disability care

education

office equipment

gymnasiums

vehicles

hotels & B+B's

bathrooms

household

caravan & RV

GP & allied health
