

# SIQURA DISINFECTANT & PROTECTANT SYSTEM

## ABOUT SIQURA

The active ingredient in SIQURA is an antimicrobial derived from coconut oil that is grafted onto a molecular adhesive. It's this adhesive that keeps the antimicrobial in place, helping to protect surfaces for much longer periods of time.

SIQURA is the smarter clean, being simple to apply, sustainable, non-leaching, long-lasting and above all, friendly to humans, pets and our environment. SIQURA contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds, and in final life, SIQURA breaks down to form harmless organic compounds. It is non-staining, pH neutral and non-corrosive, making it suitable for a wide variety of applications.

**Key Ingredients recommended by the World Health Organization for effectiveness against COVID-19**

### SIQURA Hospital Grade Surface Disinfectant & Protectant

SIQURA Hospital Grade Disinfectant is certified by the Australian TGA (Therapeutic Goods Administration) as a listed hospital grade surface disinfectant that kills >99.999% of bacteria, viruses and fungi, and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation), continually for up to 24 hours on high touch surfaces and up to 30 days on low touch surfaces.

ARTG Number: 338686

### SIQURA Neutral Multi Surface Cleaner & Protectant

SIQURA MS15 Multi Surface Cleaner & Protectant is a specifically formulated neutral detergent designed to break down biofilms, clean surfaces and extend the life of SIQURA surface protectants. MS15 breaks down biofilms that form a barrier to effective surface cleaning. Each use of MS15 applies a coating to continually protect surfaces from biofilm formation. Designed for use in conjunction with SIQURA Hospital Grade Surface Disinfectant & Protectant to repair and maintain the protective surface matrix.

### SIQURA Hand Sanitiser & Protectant

SIQURA 24 Hour Antimicrobial Hand Sanitiser is a simple and effective way to stop contact-based infection. It is alcohol-free and helps keep your skin soft and healthy. It is suitable for use by children, and can be used around food, pets and plants.

Unlike traditional alcohol based hand sanitisers that only provide short term protection, the unique Fresche technology creates an invisible microscopic layer of protection on your skin which continually destroys pathogenic microbes for up to 24 hours.

### SIQURA Floor Disinfectant & Protectant Concentrate

SIQURA Professional Flooring Disinfectant and Protectant is a simple and effective way to kill microorganisms and reduce odour in floors. It eliminates odour-causing bacteria and inhibits mould, mildew and dust mites for up to 90 days.

# THE SIQURA DIFFERENCE

## SIQURA DISINFECTANT & PROTECTANT SYSTEM

SIQURA Disinfectant & Protectant System is full range of SIQURA products built on the Fresche Technology Platform that provides a complete solution for managing hand and surface hygiene in industry, workplace, recreation facilities, and homes. The SIQURA Range and Fresche Technology Platform allows for customisation of solutions to meet specific industry and business needs.

The SIQURA solution provides tailored protocols to ensure every solution is effective, practical and efficient. This can reduce staff training, labour and product costs.

### BONDS TO APPLIED SURFACES

SIQURA Disinfectants and Protectants are applied wet, onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, SIQURA does not leach from (or leave) the treated surface and it does not deplete in microbial efficacy or promote microbial resistance.

### CONTINUOUS NON-STOP PROTECTION

Through a bio mechanical process, the electrostatic charge interacts with the bacteria lipid layer, resulting in permanent destruction of bacterial cells. Because the organo silane isn't consumed in the disinfection process, it remains continually ready to defend treated surfaces against contamination and bio film formation.

### HUMAN, PET AND ENVIRONMENTALLY FRIENDLY

SIQURA is derived from coconut oil and replicates the forces used in nature to protect against pathogens, breaking down into harmless organic compounds at end of life.

SIQURA contains no poisons or harmful chemicals such as chlorines, bleaches, carcinogenic or endocrine disruptive compounds and does not leach or accumulate in environment.

### AUSTRALIAN OWNED AND MADE

SIQURA is an Australian owned and made product and is protecting Australian jobs and the community.

## APPLICATIONS

hospitality

childcare

health and aged care

education

gymnasiums

food preparation

animal care

general household

public transport
