

Clean Surfaces and maintain the SIQURA™ defense system

SIQURA™ MS15 Multi Surface Cleaner & Protectant is a specifically formulated neutral multi-surface detergent designed to break down biofilms, clean surfaces and extend the life of SIQURA™ Hospital Grade Disinfectant and Protectant. It is ideal to use on most surfaces including aluminium, steel, plastic and fabrics. **SIQURA™ MS15** and **HG75** work together as a system. **HG75** disinfects and uses Quatlock technology to lock onto surfaces and create a self-sanitising surface that continues to defend against bacterial attack. MS15 can then be used for routine general cleaning in between disinfection cycles.

PROTECTANT**

extends Siqura surface protection system

breaks down biofilms

suitable for most surfaces

500ml

extends Quatlock surface protection

breaks down biofilms

suitable for most surfaces

easy-to-use rapid action

How do you use SIQURA™ MS15?

SIQURA™ MS15 has been designed as part of a clean, disinfect and protect hygiene system and is to be used in between your regular applications of **SIQURA™ HG75**. Together these products form an advanced antibacterial defense system for a cleaner environment.

Disinfect & Protect

SIQURA™ Hospital Grade Surface Disinfectant & Protectant destroys bacteria and locks onto surfaces to provide 24hrs of active defense on high touch surfaces and up to 30 days on low touch areas. It kills 99.999% of bacteria and is effective against viruses* including COVID-19.

Intermittent Cleaning

SIQURA™ MS15 is ideal for intermittent cleaning. Spray the entire surface area or apply directly to a sponge or microfiber cloth and wipe clean. Allow to air dry and once dry the Quatlock protective defense has been boosted.

How friendly is SIQURA™ MS15?

SIQURA™ MS15 is made from naturally derived surfactants, it's pH-7, phosphate-free and neutral. Rapidly degrading it breaks down to form simple organic compounds — reducing the potential for negative environmental impacts. It's friendly formulation will help to remove spillages and general traffic dirt from a range of hard surfaces including floors, counters, door handles, furniture and seating. It is suitable for alkali-sensitive surfaces such as terrazzo, marble or ceramic tiles.

- ✓ Solvent-free
- ✓ No chlorines
- ✓ No bleaches
- ✓ No carcinogenic compounds
- ✓ Non-oxidative
- ✓ Non-flammable
- ✓ Bio-friendly
- ✓ Phosphate & Paraben Free

How does MS15 work?

SIQURA™ MS15 has colloidal surfactants in it. Surfactants are what's called 'surface-active agents' and their role is to lower the surface tension between two things. In this case they work on a macromolecular level to clean dirt, spillages, oils and other matter by dislodging them from the surface. It also contains **SIQURA™** Quatlock which boosts the protective shield created by **75HG**.

Ideal for use within:

- Healthcare:** Hospitals & Medical Clinics
- Hospitality:** Restaurants & Cafes
- Education:** Childcare, Schools, Universities
- Public Transport:** Buses, Trains, Trams
- Retail Spaces:** Counters, Touchpoints
- Lifestyle Environments:** Gyms & Fitness
- Homes:** Furniture, Floors, Fixtures
- Vehicles:** Cars, Vans, Trucks
